

## Epidemiological Research on Data from Population-Based Cancer Registries

Programme for the Symposium on 29 Sept 2011, Mainz (at the Annual Convention GMDS & DGEpi, Room P204)

### 08.30 Opening: Maria Blettner, N.N. (Representative of Deutsche Krebshilfe)

---

#### Session 1

---

Chairs: Timo Hakulinen, Piet van den Brand

<b>08.40 – 08.55</b>	Global Strategies for Cancer: the Role of Registries – followed by 15 min discussion –	David Forman, International Agency for Research on Cancer, Lyon, France
<b>09.10 – 09.20</b>	Long-term prognosis of cancer patients in Germany: Up-to-date national estimates, regional variation and international comparisons – followed by 10 min discussion –	Hermann Brenner, Deutsches Krebsforschungszentrum, Heidelberg
<b>09.30 – 09.40</b>	Colorectal cancer incidence and mortality among participants of colonoscopy screening – followed by 10 min discussion –	Michael Hoffmeister, Deutsches Krebsforschungszentrum, Heidelberg
<b>09.50 – 10.00</b>	Population-based effects of mammography screening on distribution of tumour stages and consequences for therapy and care of breast cancer patients in Bavaria – followed by 10 min discussion –	Ulrike Braisch, Bevölkerungsbezogenes Krebsregister Bayern, Erlangen; Simone Schrodli, Tumorregister München
<b>10.10</b>	<b>Break</b>	

---

#### Session 2

---

Chairs: Hans Storm, Wilhelm Oberaigner

<b>10.30 – 10.45</b>	Nordic Occupational Cancer (NOCCA) study - an example of extreme utilization of multi-register data – followed by 15 min discussion –	Eero Pukkala, Finnish Cancer Registry, Helsinki, Finland
<b>11.00 – 11.10</b>	Quality of life in long-term survivors of breast, colorectal, and prostate cancer - First results from the CAESAR-study – followed by 10 min discussion –	Volker Arndt, Deutsches Krebsforschungszentrum, Heidelberg
<b>11.20 – 11.30</b>	Synchronisation of patients of the quality-assured mamm diagnostics programme QuaMaDi with the cancer registry Schleswig-Holstein – followed by 10 min discussion –	Heiner Fauteck, Universitätsklinikum Schleswig-Holstein, Campus Lübeck

**12.00**      **Key Note Lecture by Paolo Vineis (Room P1)**  
The evidence on gene-environment interactions and public health issues

**13.00**      **Lunch Break**

---

### Session 3

---

**Chairs: Jan Willem Coebergh, Matti Hakama**

<b>13.30 – 13.45</b>	An analysis on equity in cancer survival between population groups in a country where the survival is high – followed by 15 min discussion –	Timo Hakulinen, Finnish Cancer Registry, Helsinki, Finland
<b>14.00 – 14.10</b>	Cancer and area-based social deprivation – followed by 10 min discussion –	Ron Pritzkeleit, Universitätsklinikum Schleswig-Holstein, Campus Lübeck
<b>14.20 – 14.30</b>	Needs for nursing care of cancer patients outside of hospitals - a record linkage study – followed by 10 min discussion –	Oliver Razum, Universität Bielefeld
<b>14.40 – 14.55</b>	Experience from the Netherlands Cohort Study on cancer etiology and prognosis – followed by 15 min discussion –	Piet van den Brandt, Maastricht University, Netherlands
<b>15.10</b>	<b>Break</b>	

---

### Session 4

---

**Chairs: Steinar Tretli, Hermann Brenner**

<b>15.30 – 15.40</b>	Evaluation of the implementation of the national S3 guideline "diagnosis, therapy and aftercare for breast cancer of woman" and its influence on population based outcome in different regions of Germany – followed by 10 min discussion –	Simone Schrodi, Tumorregister München
<b>15.50 – 16.00</b>	The impact of menopausal hormone therapy, life style and genetic factors on mortality and recurrence in postmenopausal breast cancer patients (The MARIEplus study) – followed by 10 min discussion –	Dieter Flesch-Janys, Universitätsklinikum Hamburg-Eppendorf
<b>16.10 – 16.20</b>	Importance of lifestyle and environmental factors on cancer risk and prognosis: Investigating the role of Vitamin D3 and selenium in large epidemiological cohort studies – followed by 10 min discussion –	Ulrike Haug, Deutsches Krebsforschungszentrum, Heidelberg
<b>16.30 – 16.45</b>	Cancer registry data in large scale randomised trials – followed by 15 min discussion –	Anssi Auvinen, University of Tampere, Finland
<b>17.00</b>	<b>Conclusion: Hermann Brenner, Maria Blettner</b>
